Overview of Core Courses in History: History is the study of the past. As an academic discipline, History embraces every aspect of the human experience, including warfare, political institutions, the economy, religious practice, technology, and artistic endeavor. History asks students to analyze empire and revolution, genocide and humanism, enslavement and liberation, sexuality and gender and to do so from the perspective of both social scientific and humanistic inquiry. There is no field more diverse than History and none more individualistic. History can be as long ago as the excavated texts and artifacts of ancient China or as recent as mass-produced newspapers from the twentieth-century American West.

Objectives of Core Courses in History:

By the end of the semester, you will have an understanding of the following issues:

- The role played by diversity in shaping human experience
- The operation of large-scale forces responsible for causing change over time, such as politics, economics, technology, and religion
- The challenges mounted by an increasing reliance on technology
- The changes caused by the increasing interconnectedness of today's world
